

Lean Six Sigma Green Belt Program

About the Program

GO Productivity's Lean Six Sigma Green Belt training and certification program is for companies that have been improving themselves and want to build their internal capacity to continue this improvement without the need for outside help.

What You Will Learn

Participants will be trained on the Lean Six Sigma (LSS) principles up to the Green Belt skills level. You will receive complete exposure to LSS methodology and associated tools in order to receive a working knowledge of Lean Six Sigma methodology that may be implemented in the work place.

Why We're Different

Our materials are based on the methodology used by The George Group (acquired by Accenture in 2007). Michael George is generally credited with organizing the Lean Six Sigma methodology beginning with his 2002 book titled "Lean Six Sigma: Combining Six Sigma with Lean Speed".

Our Lean Six Sigma Green Belt gives you a blend of both methodologies, ensuring you have the skills and tools you'll need to sustain your productivity improvements.

Target Audience

Progressive mid-size companies looking to create advanced internal capacity in the application of Lean Six Sigma productivity improvement principles.

Mode of Delivery

This course consists of two one-week (four days per week) classroom sessions over a period of three months, with over 80 hours of classroom time. Students will receive coaching on their in-company lean project, and following completion of the classroom component, the student is expected to complete two more projects in order to achieve full certification. The program has a high instructor to student ratio to ensure that all students are receiving individual attention. Enrollment is limited to eight students.

Upcoming Sessions

Edmonton: **GB1702**

Week 1: September 11-15, 2017

Week 2: October 23-27, 2017

Edmonton: **GB1703**

Week 1: December 4-8, 2017

Week 2: January 15-19, 2018
