

GO Productivity's Lean Six Sigma White Belt

GO Productivity's Lean Six Sigma White Belt is a high-impact interactive full-day workshop that teaches your team the principles behind productivity improvement through Lean Six Sigma. It will give you a base to move forward as you build a climate of innovation and increase efficiency across every part of your organization.

Workshop Benefits

- Learn the principles of Lean Six Sigma
- Using an interactive approach, you'll see the principles and benefits at work through a hands-on simulation designed to be fun and informative
- Engage and align your team as you build a climate of continuous improvement and innovation
- Learn success stories of how organizations have implemented Lean Six Sigma
- Understand the potential benefits that you and your company can expect by implementing these principles
- Brainstorm ideas of how to apply these principles at your company and begin your road map to start your implementation journey.

Who Should Attend?

- Everyone in your company, from front-line staff to senior executives
- Team members who support process improvement projects within your organization.

Workshop Details

- Half day workshop
- Up to 20 participants
- This workshop can be delivered at your company, at a conference or meeting.
